Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 18, Leisten et al (US 6,690,336 B1) discloses a balanced antenna assembly comprising a dielectric core; an electrically conductive wire extending axially through the core; and an electrically conductive helix extending around the outer surface of the core; one end of the electrically conductive wire and one end of the electrically conductive helix being electrically connected together; the opposite ends of the electrically conductive wire and the electrically conductive helix constituting common feed terminals such as to provide a two-terminal balanced antenna assembly. Leisten, however, fails to specifically teach the configuration wherein the electrically conductive helix extending of at least one complete helical turn around the outer surface of the core.

Claims 19 and 20 are allowed for depending on claim 18.

Reasons for indicating allowable subject matter for claims 1-17 were provided in the previous Office action.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
